

LANRE FOLARIN

Senior Business Analyst | CBAP | REMS & Regulated Healthcare Systems | Agile Delivery
oofolarin@gmail.com | (647) 461-0119 | linkedin.com/in/lanrefolarin | lanrefolarin.github.io

PROFESSIONAL SUMMARY

CBAP-certified Senior Business Analyst with 14 years of professional experience in Canada, including 9 years in business analysis across regulated pharmaceutical, public sector, manufacturing, and logistics environments. Serves as the primary liaison between business stakeholders and IT delivery teams, turning complex business rules into traceable requirements, functional specifications, and testable acceptance criteria. Strong in UAT leadership, defect triage, compliance documentation, and Agile delivery, with hands-on use of Azure DevOps, Jira, Power BI, SQL, and Visio.

CORE COMPETENCIES

Business Analysis: Requirements Elicitation & Analysis, Functional Specifications & Use Cases, BRD / FRD / RTM, User Stories & Acceptance Criteria, Process Mapping (As-Is / To-Be), Change Impact Assessment

Delivery & Quality: UAT Planning & Execution, Defect Triage & Release Readiness, Agile / Scrum / Kanban, Stakeholder Workshops & Governance, Compliance & Audit Support, Traceability

Domains: Pharmaceutical REMS and Patient Support Programs, Public Sector Transfer Payments, ERP and BI in Manufacturing and Logistics

Tools: Azure DevOps, Jira, Confluence, Power BI, SQL, Visio, Lucidchart, Miro, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Senior Business Analyst | United BioSource (UBC) Jun 2026 - Present

- Support REMS (Risk Evaluation and Mitigation Strategy) platform delivery for pharmaceutical clients across patient support and hub services programs.
- Review and redline acceptance criteria across user stories in Azure DevOps, separating documentation gaps from genuine defects before tickets reach development.
- Triage ambiguous defect reports across prescriber search, activity logging, and user management workflows, confirming expected behaviour with business and QA before sign-off.
- Apply change discipline and traceability controls suited to a regulated SDLC, and maintain a consolidated tracker covering three concurrent REMS programs.

Senior Business Analyst | Ministry of Health, Ontario (Contract) Dec 2025 - Jun 2026

- Served as primary liaison between business program owners and IT delivery teams for Transfer Payment (TP) forecasting workflows, translating complex financial and program rules into 40+ prioritized epics, user stories, and acceptance criteria.
- Ran structured discovery workshops with 10+ cross-functional stakeholders to gather and prioritize requirements; produced process flows, use cases, and functional specifications that eliminated 3 manual handoff steps in approval workflows.
- Designed and deployed a Power BI reporting suite tracking SLA compliance, aging, and cycle time for TP packages, giving leadership real-time visibility and cutting manual reporting by about 3 hours per week.
- Developed ERP data validation rules and exception-handling logic for reporting datasets, reducing data errors and rework by about 25% within 60 days.
- Led UAT planning, test execution, defect triage, and stakeholder sign-off across all delivery milestones, with end-to-end traceability from discovery through release readiness.
- Supported compliance and audit activities by documenting data lineage, approval workflows, and control checkpoints aligned to government reporting standards.

Business Architect | Schneider Electric (Contract) May 2025 - Nov 2025

- Led cross-functional discovery across 6 business units, documenting end-to-end processes, data handoffs, and pain points; produced process maps and a prioritized backlog that sped up solution design planning by 3 weeks.
- Authored epics and user stories with structured acceptance criteria; coordinated prioritization and dependency mapping with Product and IT leads across 3 concurrent workstreams.
- Led change impact assessments across 4 business units, defining role-based training plans and communications that prepared 200+ users for adoption ahead of each release.
- Maintained the RAID log, decision registry, and governance reporting for a 15+ stakeholder program, reducing decision latency and preventing scope creep.

Senior Business System Analyst | Combined Metal Industries

Nov 2022 - Dec 2024

- Led requirements discovery with Finance, Engineering, and Operations to define functional and non-functional requirements for an asset recovery and contractor billing platform, turning a \$2M+ reconciliation challenge into a traceable requirements baseline.
- Authored process models, use cases, system specifications, and acceptance criteria; maintained end-to-end RTM from discovery through UAT, enabling zero-defect releases across 2 major delivery cycles.
- Established a structured UAT process including test planning, defect triage, and stakeholder sign-off gates, reducing post-release production issues by 35% compared to prior delivery cycles.
- Delivered Power BI reporting that automated cost-tracking workflows, cutting manual reconciliation effort by 40% and improving contractor billing accuracy within the first quarter.

ERP Business Analyst | Combined Metal Industries

Jan 2021 - Oct 2022

- Produced BRDs and RTMs for 5 ERP workflow and BI dashboard enhancements, reducing mid-sprint rework by 30% by aligning analytics specifications to defined business outcomes before development began.
- Drove Agile delivery in Azure DevOps, leading backlog refinement, sprint planning, and velocity tracking for an 8-person squad, achieving a 90%+ sprint completion rate across 12 consecutive sprints.
- Built Power BI dashboards for logistics KPIs that surfaced scheduling inefficiencies and contributed to \$150,000+ in annualized cost savings through data-driven routing and capacity adjustments.

Business Analyst | DB Schenker (Contract)

Apr 2019 - Dec 2020

- Owned UAT strategy and acceptance criteria alignment for 24 Power BI dashboards delivered to Finance, IT, and Operations, achieving zero critical defects at go-live across all releases over an 18-month period.
- Managed the enhancement backlog for a BI and analytics platform; profiled 5M+ records with SQL to validate the accuracy and completeness of executive reporting.
- Identified order fulfilment process improvements through analytics and stakeholder workshops, contributing to a 15% improvement in on-time shipment performance over two quarters.

Business Analyst | Mother Parkers Tea & Coffee

Aug 2017 - Mar 2019

- Delivered internal automation tools that reduced order entry errors by 30% and improved demand forecasting accuracy across 3 operational departments.
- Facilitated stakeholder pain-point workshops, converting findings into a phased delivery backlog that shipped 4 releases on schedule with measurable adoption across 50+ end users.
- Coordinated UAT and deployment for 6 system enhancements with no post-release rollbacks and full user adoption within 30 days of each release.

EARLIER CAREER**Logistics Analyst | Mother Parkers Tea & Coffee**

Jun 2015 - Aug 2017

Inventory Control Specialist | Mother Parkers Tea & Coffee

Feb 2014 - Jun 2015
