PROFESSIONAL SUMMARY

CBAP-certified Senior Business Analyst with 9+ years in Business Analysis serving as the primary liaison between business stakeholders and IT delivery teams across regulated, public sector, and industrial environments. Deep expertise in end-to-end requirements management, functional specification authorship, UAT leadership, compliance analysis, and agile delivery. Proven record of translating complex business problems into traceable, well-documented requirements that accelerate development cycles and reduce post-release defects. Experienced with Azure DevOps, Jira, Visio, and Microsoft Office Suite. Brings structured analytical discipline, cross-functional stakeholder facilitation, and a strong process improvement mindset to every engagement.

CORE COMPETENCIES

Requirements Elicitation & Analysis | Functional Specifications & Use Cases | BRD / FRD / RTM | User Stories & Acceptance Criteria | Process Mapping (As-Is / To-Be) | UAT Planning & Execution | Defect Triage & Release Readiness | Compliance & Audit Support | Azure DevOps | Jira / Confluence | Power BI | SQL Data Profiling | Agile / Scrum / Kanban | Stakeholder Workshops & Governance | Change Impact Assessment | Visio / Lucidchart / Miro

PROFESSIONAL EXPERIENCE

Senior Business Analyst | Ministry of Health, Ontario Public Service

Dec 2025 – Present

- Serve as primary liaison between business program owners and IT delivery teams for Transfer Payment (TP) forecasting workflows, translating complex financial and program rules into 40+ prioritized epics, user stories, and acceptance criteria.
- Gather, document, and prioritize business requirements through structured discovery workshops with 10+ cross-functional stakeholders; produced process flows, use cases, and functional specifications that eliminated 3 manual handoff steps in approval workflows.
- Designed and deployed a Power BI reporting suite tracking SLA compliance, aging, and cycle time for TP packages, providing leadership with real-time operational visibility and reducing manual reporting effort by approximately 3 hours per week.
- Developed ERP data validation rules and exception-handling logic for reporting datasets, reducing data errors and downstream rework by approximately 25% within 60 days of implementation.
- Led UAT planning, test execution, defect triage, and stakeholder sign-off across all delivery milestones, maintaining full end-to-end traceability from discovery through release readiness.
- Support compliance and audit-related activities by documenting data lineage, approval workflows, and control checkpoints aligned to government reporting standards.

Business Architect | Schneider Electric

May 2025 – Nov 2025

- Led cross-functional discovery across 6 business units to document end-to-end processes, data handoffs, and system pain points; produced process maps and a prioritized requirements backlog that accelerated solution design planning by 3 weeks.
- Authored epics and user stories with structured acceptance criteria; coordinated prioritization and dependency mapping with Product and IT leads across 3 concurrent workstreams.
- Led change impact assessments across 4 business units, defining role-based training plans and communications that prepared 200+ users for adoption ahead of each release.
- Maintained RAID log, decision registry, and governance reporting for a 15+ stakeholder program, reducing decision latency and preventing scope creep throughout the engagement.

Senior Business System Analyst | Combined Metal Industries

Nov 2022 – Dec 2024

- Led requirements discovery with Finance, Engineering, and Operations stakeholders to define functional and non-functional requirements for an asset recovery and contractor billing platform, translating a \$2M+ reconciliation challenge into a structured, traceable requirements baseline.
- Authored process models, use cases, system specifications, and acceptance criteria; maintained end-to-end RTM from discovery through UAT, enabling zero-defect releases across 2 major delivery cycles.
- Established a structured UAT process including test planning, defect triage, and stakeholder sign-off gates, reducing post-release production issues by 35% compared to prior delivery cycles.
- Delivered Power BI reporting improvements that automated cost-tracking workflows, reducing manual reconciliation effort by 40% and improving contractor billing accuracy within the first quarter of deployment.

ERP Business Analyst | Combined Metal Industries

Jan 2021 – Oct 2022

- Produced BRDs and RTMs for 5 ERP workflow and BI dashboard enhancements, reducing mid-sprint rework by 30% by aligning analytics specifications directly to defined business outcomes before development commenced.
- Drove Agile delivery in Azure DevOps, leading backlog refinement, sprint planning, and velocity tracking for an 8-person squad, achieving 90%+ sprint completion rate across 12 consecutive sprints.
- Built Power BI dashboards for logistics KPIs that surfaced scheduling inefficiencies and contributed to \$150,000+ in annualised cost savings through data-driven routing and capacity adjustments.

Business Analyst | DB Schenker

Apr 2019 – Dec 2020

- Owned UAT strategy and acceptance criteria alignment for 24 Power BI dashboards delivered to Finance, IT, and Operations, achieving zero critical defects at go-live across all releases over an 18-month period.
- Managed product enhancement backlog for a BI and analytics platform; performed SQL data profiling across 5M+ records to validate accuracy and completeness, ensuring reporting integrity for executive decision-making.
- Identified order fulfilment process improvements through analytics and stakeholder workshops, contributing to a 15% improvement in on-time shipment performance over two quarters.

Business Analyst | Mother Parker's Tea & Coffee

Aug 2017 – Mar 2019

- Delivered internal automation tools that reduced order entry errors by 30% and improved demand forecasting accuracy across 3 operational departments.
- Facilitated stakeholder pain-point workshops, converting findings into a phased delivery backlog that shipped 4 releases on schedule with measurable adoption across 50+ end users.
- Coordinated UAT and deployment for 6 system enhancements with no post-release rollbacks and full user adoption within 30 days of each release.

CERTIFICATIONS & EDUCATION

Certified Business Analysis Professional (CBAP) IIBA

2022

Product Management Certification Product School

2023

Bachelor of Business Administration, Human Resource Management Sheridan College
